SKILLS

Git Master, Unix Enthusiast, Designer, Guitarist, Team player, Leader, Dedicated Tutor/Mentor, World Traveller

JAHAN KURUVILLA CHERIAN

EDUCATION

University of California, Los Angeles Expected June '18
B.S Computer Science
GPA: 3.73

WORK EXPERIENCE

Autodesk - SWE Intern June '16 - Sep '16

- Created a serialization mechanism to package a large number of low level calls within AutoCAD, using custom JSON packaging.
- Wrote an IPC mechanism in C++ to be able to extensibly transfer the calls at high speeds and efficiency.
- Extended my serialization project into a library used for unit testing purposes for further Research and Development.

TOP PROJECTS

Lighthouse - Co - founder and iOS Engineer
Guiding the world to a safer place with the click of a button

- Created networking API using Alamofire in Swift to communicate with our server in Ruby on Rails.
- Built the entire mapping and tracking functionality using Apple's CoreLocation services and Google Maps iOS SDK.
- Built custom views using CoreGraphics and custom extensions of UIKit.
- Built TodayExtension to provide ease of access button on the lock screen.
- Re-vamping the application to become the default dialer app, creating the UI/UX in Sketch and implementing the functionality in Swift.

Stitch - Co - founder and iOS Engineer

Putting artistic Artificial Intelligence into the hands of everyone

- Developed the iOS networking API with AWS using Alamofire, to push and get images to a Node server.
- Implemented the neural style Convolutional Neural Network within the AWS server to generate the artistic image on a powerful GPU.

Future Without Borders - Co - founder and iOS Engineer

Connecting refugees for a better future

- Built out the functionality in Swift for iOS using Parse and Facebook's SDK, MapKit SDK, Stripe and Paypal SDK for donations and regex's for form control.

BrainSpace VR - Co - founder and Engineer

Experience the human brain like never before

- Scraped the web using the BeautifulSoup library in Python to gather automated data of the brain from medical sites for display in Oculus.
- Used C# within Unity with the Muse and Myo API's to connect the Muse headband and Myo armband for user interactivity with the brain.

EXTRA-CURRICULARS

Tutoring Chair for Tau Beta Pi Dec '15 - Present

- Create tutoring schedules, manage all the tutors, host events and tutor within the STEM field at UCLA.

Tutoring Committee for Upsilon Pi Epsilon Jan '16 - Present

- Host midterm and final review sessions for Computer Science classes, specializing in computer architecture, data structures and algorithms and operating systems.

Frontend Developer for Daily Bruin Jan '16 - Present

- Work with AngularJS and REACT to create beautiful websites for student run media at UCLA.
